Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-47,70-72, drawn to medical device, classified in class 623, subclass 11.
- II. Claims 48-69, drawn to a method for making a medical device, classified in class 428, subclass 35.7.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the medical device of group I does not require the specific steps of processing the matrix polymers and bioactive agents under conditions that prevent partitioning of the bioactive agents to the surface of the matrix polymers.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Bonham on 9/30/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
